TENNECO CHEMICAL AND MATERIAL GREY LIST [2020-June]

Chemical compounds, which are only to be used to a limited extent at Tenneco.

The list contains chemical compounds, which since it is highly possible that they will become prohibited substances in the near future, it is necessary to examine alternative technologies. Except when they correspond to exemption, the use of any of these substances in materials, parts, and products must be notified if the amount in use exceeds the regulation value.

Any person who introduces a new product at Tenneco is responsible for examining if the product contains one or several of the chemical compounds on the list and if this is the case, the person must initiate an assessment of the possibility of substituting the product with a gentler alternative.

possibility of substituting the product wil	ira geriller alternative.
