TENNECO CHEMICAL AND MATERIAL BLACK LIST [2020-June]
The purpose of this document is to avoid the use of substances, which can not be legally applied at Tenneco or to avoid the use of undesirable substances that are constituents of the company products. Furthermore, it is meant to ensure that undesirable substances will not be applied unless they have been thoroughly considered. Any person who introduces a new product to Tenneco is responsible for examining if the product contains one or several of the chemical compounds on the Chemical and Material Blacklist. Below list shows which chemical compounds are:

1. Banned according to national or international legislation.

1. Banned according to national or international legislation.

1. Banned according to national or international legislation.

New products containing one or several of the chemical compounds from below list must not be applied at Tenneco System. If one of the listed chemical compounds is used in the production, a plan for termination of use of the product must be prepared. The plan must contain a date of the final termination.

The prohibition applies to any calculated use of the chemical compounds on the list. However, the prohibition does not apply in cases where the chemical compounds occur as impurities in an applied product, i.e. undesirable occurrence in very small amounts. Any person who introduces a new product at Tenneco System is responsible for checking if the product contains one or several of the chemical compounds represented on the list. Chemical compounds the product of the product of the chemical compounds represented on the list. Chemical compounds should not present substances performed as in documents with the susered date.
